PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering student specializing in Artificial Intelligence and Machine Learning, with hands-on experience in Generative AI, NLP, Computer Vision, RAG, remote sensing, and full-stack development. Experienced in building AI-driven applications, processing spatial agricultural data, developing multilingual advisory systems, and applying deep learning to satellite image restoration.

EDUCATION

Balaji Institute of Technology and Science
B.Tech in Computer Science and Engineering – Artificial Intelligence and Machine Learning
CGPA: 8.7/10.0 (up to 5th Semester) |

June 2024 – June 2028
Warangal, Telangana

EXPERIENCE

Infosys Springboard
AI Project Intern – Infosys Virtual Internship 7.0

July 2026 – Present
Remote, India

- Building a multilingual Agricultural Advisory AI System using Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG) for localized crop advisory across regional languages.
- Developing pipelines to process and vectorize spatial agricultural data and microclimate indicators for retrieval-based recommendations.
- Designing NLP interfaces for agricultural queries and contextual query resolution.

Science Cadet Corps (SCC-A)
Summer Intern – Engineering & Sustainability

May 2026 – June 2026
On-Site, India

- Completed a 70-hour interdisciplinary internship covering environmental engineering, sustainability, and process safety.
- Studied water and air purification systems, home ventilation, and sustainability-focused engineering practices.
- Performed HAZOP-based risk analysis for polymerization processes and participated in technical site studies at IMD and NEERI.

Infosys Springboard
AI Intern – Empow(h)er Capstone Internship

April 2026 – June 2026
Remote, India

- Developed “CHANDANA”, an AI-powered Learning Buddy using Generative AI, Prompt Engineering, and Conversational AI.
- Implemented Python-based AI-agent workflows for doubt resolution, content generation, and intent classification.
- Applied Software Development Life Cycle practices and presented the project to industry mentors.

Tata Group – Forage
GenAI Powered Data Analytics Simulation

April 2026
Remote, India

- Performed exploratory data analysis for customer risk and delinquency assessment.
- Worked on predictive risk assessment and an agentic AI strategy while considering fairness, explainability, and regulatory compliance metrics.

PROJECTS

GeoRestore-AI

PyTorch, OpenCV, Remote Sensing, Deep Learning

- Developed a deep learning-based satellite image restoration system for recovering cloud-affected imagery.
- Explored cGAN and Autoencoder architectures for image restoration and evaluated reconstruction quality using PSNR and SSIM.
- Focused on preserving land-surface reflectance information and vegetation indices for downstream remote-sensing analysis.

Multilingual Agricultural Advisory AI System

LLMs, RAG, LangChain, Vector DB, Python

- Built a conversational AI system providing agricultural advisory in regional Indian languages.
- Implemented Retrieval-Augmented Generation with a vector database for soil, crop, and weather datasets.
- Worked with language-model fine-tuning concepts and prompt optimization for context-aware responses.

MediVerse

Full-Stack, Python, Machine Learning, REST APIs

- Developed a healthcare analytics and diagnostic decision-support application for disease risk assessment.
- Designed modular REST APIs and full-stack data workflows covering preprocessing, feature extraction, validation, and inference.

TECHNICAL SKILLS

Geospatial & Remote Sensing	Satellite Image Processing, Cloud Removal (cGANs), Spatial Data Analysis, QGIS
AI/ML & Frameworks	Generative AI, Prompt Engineering, NLP, Computer Vision, PyTorch, OpenCV, Scikit-learn, Pandas, NumPy, RAG
Programming Languages	Python, Java, JavaScript, HTML, CSS
Web Technologies	React.js, Node.js, FastAPI, Tailwind CSS
Databases & Cloud	MySQL, SQLite, Firebase, Vercel, Render
Tools	Git, GitHub, VS Code
